FALCON SEELSTER STILL FLYING HIGH

Like the great sire **Tar Heel** who at the age of 28 sired **Hazel Hanover** the fastest 2YO filly of all time, **Falcon Seelster** continues to amaze with his ability to remain at the top end of all siring results both in Australia and New Zealand.

In what will almost certainly be his last season with both fresh and frozen semen, breeders in both countries are quick to recognize the need to try and breed a Falcon Filly to protect their future broodmare choices.

Falcon Seelster with no Meadow Skipper, Artsplace or Direct Scooter blood is the perfect outcross to breed back to these dominating sires.

Breeders need to protect their future by having a Falcon Mare.

To see the current results breeders should look up the 2010/11 Season Results. The answers are all there. Both racing and broodmare lists give the facts. He is still a star in both departments.
